— Definition

Recycled graphite box plates are recycled graphite material recovered from graphite box plate use or stock. Public purchasing communication should focus on size, material condition, plate integrity, impurities, machinability, quantity and delivery terms.

— Buyer Confirmation Checklist

Check item	What buyers should provide	Why it matters
Product form	Recycled graphite box plates, full plates, cut plates or irregular plates	Affects sorting, machining and loading method
Dimensions and thickness	Length, width, thickness range, tolerance or photos with scale	Helps check whether the batch fits cutting, machining or reuse
Material condition	Surface oxidation, cracks, holes, impurities and moisture condition	Supports batch review and usable range confirmation
Application direction	Recycled graphite material, machining blank or other industrial use	Defines the focus for integrity, dimensions and impurity control
Purchase terms	Quantity, packing, batch photos, destination and expected delivery time	Determines quotation, logistics and supply feasibility

Inquiry Checklist

- Product name: recycled graphite box plates / recycled graphite material
- Dimensions, thickness, plate integrity and surface condition
- Application, impurity requirement and moisture condition
- Quantity, packing method, destination and expected delivery time
- Whether batch photos, samples or machining discussion are required

FAQ

Can buyers request recycled graphite box plates by tonnage only?

Tonnage alone is not enough. Dimensions, thickness, plate integrity, impurities and batch photos affect usability, packing, loading and quotation.

How are recycled graphite box plates different from crushed graphite crucible scrap?

Both are recycled graphite material topics, but the form is different. Box plates focus on plate size, thickness and integrity, while crushed crucible scrap focuses on particle size, lump size and impurities.

Why are batch photos important?

Photos help review plate shape, cracks, surface condition, impurities and batch consistency before detailed quotation or sampling.
